

2 Hole - Lite Inside Corner Bracket

Part Description:

The 2 hole - lite inside corner bracket is an external fastening method that creates a 90 degree connection. It is a lightweight bracket that requires no machining services and can provide infinite positioning along the profile T-slot, allowing a large degree of adjustability. The 2 hole - lite inside corner bracket engages the 2-degree drop-lock feature when the assembly bolts are tightened to the required torque. It is a fastening method that can be repositioned and reused.
