

Product Details

- Triple-staggered wheel placement provides consistent contact with boxes for a smooth rolling experience
- ESD polyethylene wheels prevent static buildup, ensuring product safety in electronics and lean manufacturing environments
- 96" (2438mm) long, 3.375" (85mm) wide steel frame offers durability for high-load applications
- 32mm wheels, spaced 25mm apart, ensure optimal weight distribution for varying carton sizes
- Compatible with all R85-series mounting accessories, allowing customization for any flow rack configuration

Staggered Steel Roller Track Wide
