

MOUSE VALVE SERIES DESCRIPTIONS

Standard Series

2- and 3-way manifold and in-line mounting. Normally-Closed and fully-ported versions.

Higher Flow 2-Way Version. The standard series also includes an option that provides higher flow for 2-way, Normally-Closed applications. Although manifold mounting is accomplished in the same fashion, the inlet is the annular port, and the outlet becomes the center port, through the convenient stud mount of the valve.

- Nickel-plated brass fitting
 - Electroless nickel-plated steel housing and core
Nitrile seals standard
 - Electroless nickel-plated brass body
 - Stainless steel stud and nozzle
- (Manifold style valve shown)

Corrosion-Resistant "CR-" Series

Clippard's Corrosion-Resistant Series (CR-) incorporates materials and construction that provides enhanced protection for valves used with mildly corrosive media such as moisture in air or gases. Where stainless steel is not possible, plating is incorporated to add life to wear components. A nickel-plated brass valve body is standard, but stainless steel may be substituted.

- Nickel-plated brass fitting
 - Stainless steel housing and core
 - Nitrile seals standard
 - Electroless nickel-plated Spider
- (Manifold style valve shown)

Analytical "A-" Series

Clippard's Electronic Analytical Valve (A-) series combines the proven features of the "Mouse" series with the specific needs of the analytical industry, and for applications where cleanliness is especially important. Special materials, manufacturing and assembly processes make this valve perfectly suited for applications where internal cleanliness, bubble-tight operation, and long life are imperative.

For more information, visit clippard.com/analytical

- Integral fitting
 - No anaerobic sealant used
 - Larger cross section O-ring improves sealing
 - Cleaned per Clippard Standard ES-3.43
 - One-piece base eliminates many leak points
- (Manifold style valve shown)

Oxygen Clean "O-" Series

All EV, ET, EC and EW series electronic valves with the "O-" part number option are available manufactured and assembled for use in Oxygen-enriched environments for applications that are extremely sensitive to contamination.

- Valves are ultrasonically cleaned, assembled, inspected and tested in an enclosed controlled area with a state-of-the-art positive pressure HEPA filtration system
- Both organic and inorganic contaminants such as particulate matter and Hydrocarbon oils are removed
- No organic sealants, adhesives or lubricants are used in the manufacturing process
- Component parts are lubricated with Oxygen-compatible PFPE (perfluoropolyether) grease, only as needed for assembly
- Individual testing and inspection is accomplished utilizing compressed Nitrogen and ultra-violet light

- Integral fitting
No thread sealant
- All wetted parts
cleaned per Clippard
Standard ES-3.41
- Electroless nickel-plated
steel housing and core
- FKM seals
- Stainless steel
nozzle
- Electroless nickel-
plated brass body
- Integral stud
No thread sealant
- PFPE lubricant

(Manifold style valve
shown)

For more information
on the process, visit
www.clippard.com/oxygen

ECN, EVN, ETN Mouse Valves

Normally-Open, manifold mount to allow Normally-Closed and Normally-Open valves on the same manifold. See [page 187](#) for ordering information.

- Integral fitting
- Armature "spider"
above coil
- Mounts side-
by-side with
Normally-Closed
version
- (Manifold style
valve shown)

Custom EV Valves

Don't see it here? Call us! Many people shy away from asking for customized products and fear increased price and lead times. Clippard's electronic valve production consist of nearly 50% customized product. From the simple tweaks to complex challenges, Clippard is your partner for finding the right solution to your needs.

Metric line available. Visit www.clippard.com

EV, ET, EC, EW SERIES HIGHER FLOW VALVES

EC, EV, ET & EW PILOTED 2-WAY & 3-WAY NORMALLY-CLOSED, PRESSURE PILOTED VALVES, MANIFOLD MOUNT

Medium: Air

Materials: Nickel-plated brass, acetal, stainless steel and Nitrile

Response: 20 milliseconds @ 20 psig;
13 milliseconds @ 100 psig nominal

Ports: Inlet and outlet through manifold

Material: Nickel-plated brass, acetal, stainless steel and Nitrile

Note: Use only Normally-Closed 3-Way Pilot valves in conjunction with EVB-2/EVB-3

Part No.

- EVB-2 2-Way Valve Booster
- EVB-3 3-Way Valve Booster

Input Pressure	Air Flow
20 to 150 psig	6.1 scfm @ 100 psig

ELECTRONIC INTERFACE 3-WAY NORMALLY-CLOSED VALVE

Medium: Air

Filtration: 10 micron

Ports: 1/8" NPT female

Switching Speed: 10 milliseconds

Bleed Flow: 0.10 scfm @ 100 psig

Frequency Response: 50 Hz @ 100 psig;
70 Hz @ 30 psig

Part No.

- 2013-6 Interface Valve, 6 VDC
- 2013-12 Interface Valve, 12 VDC
- 2013-24 Interface Valve, 24 VDC

Continuous Overload: 350% @ 25°C ambient; 250% @ 50°C ambient

Power Consumption: Less than 0.50 watts @ rated voltage (80 ma. @ 6 VDC, 40 ma. @ 12 VDC 20 ma. @ 24VDC)

Leads: 28 gauge stranded PVC insulated

Input Pressure	Air Flow
30 to 100 psig	22 scfm @ 100 psig
<i>call for special configurations</i>	

3-WAY NORMALLY-CLOSED, PRESSURE PILOTED VALVES

Medium: Air

Pilot Pressure: (2020) 60% of supply pressure, minimum

Response: Approximately 20 milliseconds

Mounting: Mounting holes provided

Ports: Inlet and outlet, exhaust 1/8" NPT Pilot supply on 2020 is #10-32 female

Materials: Anodized Aluminum, Stainless Steel and Nitrile

Additional Note: Use only Normally-Closed 3-way pilot valves in conjunction with 2020/2021

Designed to be piloted by a Clippard EC, EV and ET manifold mount electronic valve (not included). Output from the EC, EV and ET actuates the valve to produce outputs up to 22 scfm at 100 psig. Combines low wattage, long life and cool running of the EC, EV and ET valves with quick response and high flow of Clippard "Fluidamp" type valves. The 2020 and 2021 are identical in all respects except one. The 2020 has an external #10-32 pilot port.

Part No.

- 2020 External Piloted Valve with #10-32 Port
- 2021 Internal Piloted Valve

Input Pressure	Air Flow
30 to 100 psig	22 scfm @ 100 psig
<i>call for special configurations</i>	

ET PILOTED 4-WAY VALVES & CONNECTORS

4-WAY PILOTED VALVES

Type: 4-way combination electronic and modular spool type interface valve. Fully-ported ET-3 & R-401 (R-481)/R-402 (R-482) hybrid

Medium: Air, water, or oil; pilot - air only

Mounting: Uses Octoport base and two captivated screws

Ports: Valve has patented Octoport system

Note: Supply pressure must be applied to both ports 1 and 4. Minimum pressure on port 4 should be 40 psig.

Part No.

<u>R-481-12</u>	ET-3/R-401, 12 VDC
<u>R-481-24</u>	ET-3/R-401, 24 VDC
<u>R-482-12</u>	ET-3/R-402, 12 VDC
<u>R-482-24</u>	ET-3/R-402, 24 VDC

Input Pressure	Air Flow
Pilot: 40 psig min.	9 scfm @ 100 psig
Working: 0 to 150 psig	

For more information please see Page 270 in the Modular Valve section of this catalog.

ET VALVE CONNECTORS

Black molded lug connectors are available for easy push-on connection ET-C48 is 48" in length, ET-C120 is 120" in length.

Insulated crimp-on spade lug connectors are available for wiring up leads to connect an electronic circuit to ET style valves. Accepts #22, #24, or #26 wire.

Part No.

<u>ET-C48</u>	48" Connector
<u>ET-C120</u>	120" Connector

Part No.

3831 Spade Lug Connector

EC & EI VALVE CONNECTORS

TE Connectivity #5-103956-1 with 18" or 120" wire leads for EC/ECO and EI/EIO valves.

Part No.

<u>C2-RB18</u>	18" Connector
<u>C2-RB120</u>	120" Connector

CUSTOM PORTS & CONNECTORS

If you need a product that fits your application perfectly, Clippard has the capability to design or modify one of its products to suit your exact needs.

This application requires a special connection to a MAPP gas canister. The valve is tested for response time and flow rate, which delivers a consistent amount of gas each cycle.

1/8" NPT Outlet

Oxygen Clean Manifolds

Multi-station manifolds are available for use with Clippard's Oxygen Clean series electronic valves. These manifolds offer either single-sided or double-side mounting in Oxygen-compatible ENP brass material.

The Oxygen series products are manufactured and assembled for applications in Oxygen-enriched environments which are extremely sensitive to contamination. Each manifold is cleaned according to Clippard Specification #ES-3.41, and double bagged in heat-sealed polyethylene bags.

Input Ports: In-line 1/8" NPT

Outlet Ports: #10-32

Mounting: #10-32 tapped holes

Materials: ENP Brass

Single-Sided		Double-Sided		Length "A"	Mtg. "L"	"M"

Multi-Valve Manifolds

Construction: Black anodized aluminum

Single-Sided		Double-Sided		Length "A"	Mtg. "L"	"M"
Part No.	Stations	Part No.	Stations			
15481-2	2	15482-8	8	0.444	1.826	0.937
15481-4	4	15482-8	8	0.913	3.702	1.875
15481-6	6	15482-12	12	0.913	5.577	3.750

Auxiliary Power Input

Power to operate the valves may be provided through two sources: ONE, through the 25-pin connector if your signal source also has sufficient power to operate the bank of valves, or TWO, through a separate auxiliary power input connection built into the board. To isolate power from the 25-pin connector, use the power source selector switch.

NOTE: In applying power on a temporary basis, use care to observe proper circuit polarity.

Reverse Polarity Protection

Circuit using diodes and capacitor provides input voltage protection against reverse polarity.

Resistor-Diode-LED Circuit

Individual circuit to each valve provides protection against shut-off spikes. LED is illuminated when valve is actuated.

Printed Circuit Board

Durable laminated fiberglass

3-Position Detented Switches

Three position slide switch provides for: ON - Power "ON"; valve is activated; OFF - Power "OFF"; valve not connected; CONN - Valve connected to 25-pin connector, and will be controlled through it.

Power Selector Switch

Two-position selector switch enables choice of power input source (25-pin connector or auxiliary).

25-Pin Connector

Clippard Electronic Valves

Clippard Valve Manifold

Compact, efficient mounting of the valves is by Clippard multi-valve manifolds.

LED Bank

Illuminated LED signals that the valve is actuated.

Clippard Electronic Manifold Cards

Now you can direct low-voltage DC signals from controllers, systems, computers or other sources to operate powerful pneumatic valves with a minimum of piping and hook-up.

Self-contained card includes:

- 8 or 12 Clippard ET interface valves
- Manifold mount for single air supply
- Circuit board fully wired
- Instant plug-in with 25-pin connector
- Resistor, diode, LED and switch for each valve
- Auxiliary power supply connection

Ready to operate quickly. Just mount the card and make external connection. And each valve may be individually removed and replaced without any need for desoldering!

Convenience in interfacing electronics and pneumatics . . . completely assembled, manifolded valve cards.

Features

- Fast, easy to mount
- Pre-assembled; all valves mounted
- Low power requirements (0.67 watt per valve)
- Choice of valve types
- Each valve switchable
- Shut-off spike protection
- 25-pin connector
- No expensive card rack required

EMC-08-00-01 and EMC-12-00-01 are part numbers for cards without any valves, and without manifold. Manifold mounting hardware is included. Manifolds may be ordered separately, if desired. Part numbers are: 15482-8 and 15482-12.

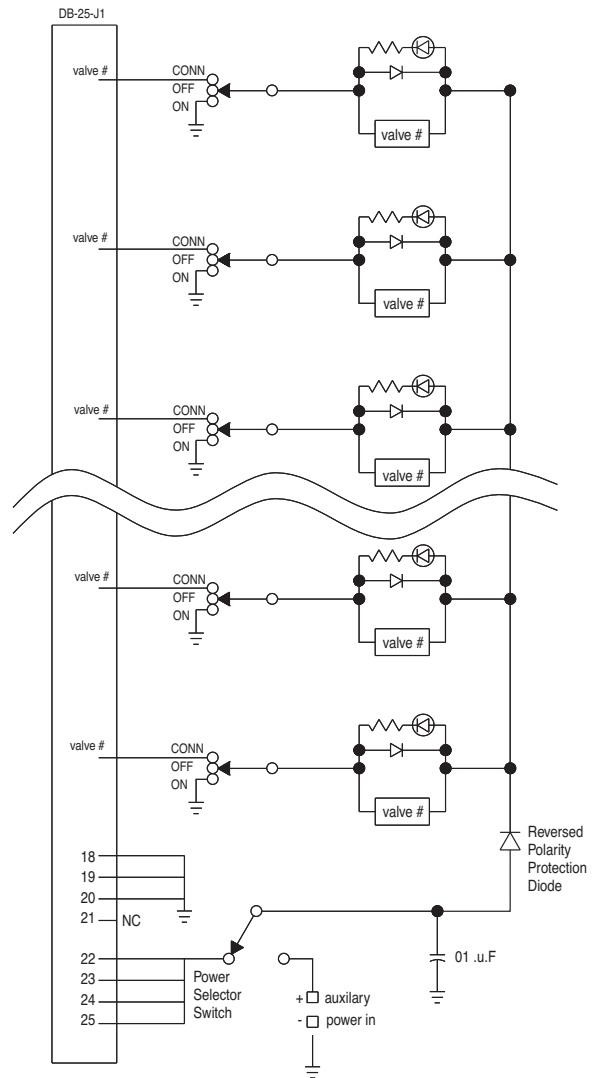

ELECTRONIC MANIFOLD CARD

EMC-08

EMC-12

Wiring Diagram

Note: Manifold mounted valves are Normally-Closed. Use ETO models if exhaust must be ported. ETO models cannot be used "Normally-Open" without special piping.

An even smaller Mouse valve! When space is critical, the EM Series Valve provides the best solution. At just over an inch tall, and less than 3/4" in diameter, the EM Valve uses Clippard's special "spider" design. This reliable and proven design for long life is housed in a miniature body, and incorporates wire leads out the top, allowing body rotation for close-center mounting. In addition, the valve features higher flow; combining fast shifting speed, extremely high cycle life with the design flexibility to make this valve a "small wonder" for demanding applications.

This valve is perfect for air and/or gas control, pilot control, and any application where space is limited, but desired performance is not.

Medium: Clean, dry air (40 micron filter)

Power Consumption: 1 watt

Temperature Range: 32 to 150°F

Response: 10 milliseconds at nominal voltage (15 milliseconds N.O.)

Operating Range: 90 to 120% of rated voltage

Voltage: 12 VDC or 24 VDC. Other voltages available upon request.

Ports: #10-32 Exhaust

Simply tighten valves onto the manifold using a standard 1/8" Allen hex wrench. (4-10 in.-lbs. Do not over-tighten)

Metric line available. Visit www.clippard.com

NEW! EFB Series Fill & Bleed Circuits

A Fill and Bleed Circuit is a combination of pneumatic valve components used to inflate a volume or apparatus in one controllable function, and to release or vent pressure in a second controllable function. See Pages 210 & 211.

Manifold Assemblies

Our Value Added department provides assembly services for all Clippard components. If you have a need for special or standard manifolds, and would like to receive a single part number with all components assembled and tested, just contact Clippard. We provide application assistance, special testing, kitting of parts, control boxes, manifold assemblies, and more. Let our experience and capabilities work for you.

Valves are small in size with a variety of coil voltages and flow options. Mounting is as close as 7/8" on center.

Housing is molded Zytel® ST 801 for toughness and rigidity.

Valves feature low power, cool running, quiet operation and fast response time. They convert low voltage, low current signals into high pressure pneumatic outputs.

ESO and similar styles have top hose barb or #10-32 (M5) threaded fitting for N.C. exhaust or N.O. inlet.

Coils are available to mate with TE Connectivity #5-103956-2 with connector or with 18" wire leads which utilize #26 wire.

Clippard ES valves are unique, with only one internal moving part that travels a mere 0.007".

Quality Design

The compact ES valve, like Clippard EV and ET valves, converts low voltage, low current signals into high pressure (0 to 105 psig) pneumatic outputs, utilizing a unique, patented valving principle. Since there are no sliding parts, and complete poppet travel is only 0.007", low power consumption and exceptionally long life are assured with this design. No flow is required for cooling because the compact ES is cool, as well as quiet, in operation.

The compact nature of design makes this valve well suited to a wide range of applications in biomedical, environmental test equipment, textile machines, packaging machinery, computerized industrial automation, and portable systems.

Features

- Close mounting - 7/8" on center
- Overall height less than 1"
- Easy to mount on manifold with two #4-40 screws
- Geometric design
- Polymer housing - Zytel ST 801® super tough
- TE Connectivity-style pin connection or 18" wire leads
- Flow up to 0.6 scfm

Zytel ST 801® super tough and Zytel® are a registered trademark of DuPont

ES & ESO SERIES VALVES SINGLE MANIFOLDS

Single-Station Side Port Manifold

Part No. **Description**
26090-1 Side Port Manifold

The ES/ESO series valve was developed to fit into tighter physical envelopes. By reducing the size of the base as well as the size of the coil, a considerable volume savings was achieved.

Single-Station Bottom Port Manifold

Part No. **Description**
26090-2 Bottom Port Manifold

As in the case of the EV/EVO product, the ES/ESO uses the single moving part design proven many times in the EV/ET/EC series valves. Of course, given the reduced size of the coil the power to operate increases to 1 watt.

Dual-Station Manifold

Part No. **Description**
26090-3 Dual Station Manifold

Because of its reliability, the ES/ESO series valve is found in many of the same applications and industries as its predecessor, the EV/ET/EC. However, the smaller size finds it used more commonly in portable or mobile equipment. This makes the valve particularly applicable in home healthcare applications.

NEW! 2-WAY ELECTRONIC VALVES, MANIFOLD & CARTRIDGE MOUNT

The Next Generation valve that is compact, quick and offers flows to 100 l/min!

Clippard Minimatic® DV, DT series electronic valves are precision-built 2-way control valves, utilizing a unique, patented valving principle. This powerful series was designed as the next generation of the well-known and trusted original EV line of Clippard “Mouse” valves. With a life of over a billion cycles, a solid, compact design, and extremely high flow rates, these valves are suitable for many applications across numerous diverse industries. A variety of voltage, connector and mounting options are available.

- Industry standard for leak-free operation
- Design flexibility and fast response
- Designed to accommodate large flows with more stroke
- Robust stainless steel “Spider”

Fast! High Flow! Economical!

Features

- Bidirectional flow
- Fast response
- Low heat rise/low power
- Small package
- Single moving part-low friction and wear
- Two orifice sizes
- Two connection styles
- Two mounting types

NEW! 2-WAY ELECTRONIC VALVES, MANIFOLD & CARTRIDGE MOUNT

Easy Mounting

The DT/DV series electronic valves are available with two mounting options. Manifold models are equipped with a bottom stud, 5/32" long with #10-32 thread, which fits Clippard standard and special manifolds, accessory valves and subplates. Spanner holes in the valve body permit tightening.

Cartridge models fit into a 3/4" and 5/16" bore.

Multi-Station Manifolds

Material: Black anodized aluminum.

Ports: 1/8" NPT

Part No.

- 15781-2 2-Station Manifold
- 15781-4 4-Station Manifold

Manifold Mount

Single-Station Manifolds

Material: ENP brass standard. Others materials available, consult factory.

EVP SERIES PROPORTIONAL CONTROL VALVES

The EVP series Proportional Control Valves combine the features of the existing EV series valve - long life, low power, and Clippard's reputation for high quality components - with the additional capability for proportional control.

The EVP series valve provides air or gas flow control, and varies the output flow based on the current input to the solenoid. The consistent gain (see chart) of this valve provides a high degree of control for many applications.

Controllability and overall value are the main features of the EVP Proportional Valve series. The valve may be controlled using DC current, open or closed-loop control, and even PWM (Pulse Width Modulation) to cover a broad range of applications.

Features

- Flow proportional to input current
- Fast response
- Long life
- Small package
- Single moving part
 - low friction and wear
- Five orifice sizes
- Three connection styles
- Two mounting types

Designed For:

- Analytical Instruments
- Blood pressure monitoring
- Precise pressure control
- Patient Simulators
- Automotive
- Gas Controllers
- Mass Flow Control
- Gas Chromatography
- Respirators / Ventilators and many more...

Metric line available. Visit www.clippard.com

EVP SERIES 2-WAY PROPORTIONAL CONTROL VALVES

Based on Clippard's original spider design from 1973, the EVP's armature is the heart of the valve which provides precise flow control.

In-Line Mount Manifold Mount

- Medium:** Clean, dry air or inert gases
- Power Consumption:** 1.9 watts at 73°F, 2.3 watts max
- Temperature Range:** 32 to 120°F
- Ports:** #10-32 Female (in-line), #10-32 Male Stud (manifold). (see page 191 for manifold options)
- Seal Material:** Nitrile; FKM and EPDM. Others available.
- Maximum Hysteresis:** 10% of full current

Operating Pressure

The EVP Proportional Valve can be calibrated for pressures less than the Maximum Pressure shown above. Lower pressures may be substituted in increments of 5 psig, and will be used for calibration. For pressures less than 5 psig, please consult Clippard Instrument Laboratory, Inc.

Note: Voltage, Orifice and Pressure are determined by the Part Number configured on the following page.

To determine the correct orifice required, locate the colored line immediately above the flow/pressure intersection. Example: 9 slpm required at 45 psig inlet. This example leads to a "-2545" valve (0.025" nozzle, 45 psig).
